

**Amendment to the Claims** **JC17 Rec'd PCT/PTO 08 JUN 2009**

1. (Currently amended) A giving set cap (40) for providing fluid communication between two vessels (2, 14), the cap comprising a delivery tube having a main channel (50) for delivering fluid from a first vessel (2) to a second vessel (14) and a subsidiary channel for the delivery of a different material to said first or second vessel, ~~characterised~~ characterized in that the cap has an inlet (48) for delivering fluid from said first or second vessel through the main channel, the inlet being spaced at a sufficient distance from an outlet (46) of the subsidiary channel to allow mixing of the different material with said fluid prior to delivery to said other vessel and that an inlet (45) of the subsidiary channel is adapted to receive a needleless syringe.
2. (Currently amended) A giving set cap as claimed in claim 1, wherein the outlet (46) of the subsidiary channel is spaced at least ~~40mm~~ ten millimeters from the inlet of the main channel (50).
3. (Currently amended) A giving set cap as claimed in claim 2 wherein the outlet (46) of the subsidiary channel is spaced at least ~~20mm~~ twenty millimeters from the inlet of the main channel (50).
4. (Cancelled)
5. (Currently amended) A giving set cap as claimed in ~~any one of the preceding claims~~ claim 1 further comprising connector means (42) for allowing attachment of the cap (40) to a giving set chamber (14).
6. (Currently amended) A giving set cap as claimed in ~~any one of the preceding claims~~ claim 1 further comprising piercing means (44) for attachment of the cap (40) to an intravenous bag or container.

7. (Currently amended) A giving set cap as claimed in claim 6 wherein one end of the delivery tube is tapered to provide said piercing means (44).
8. (Cancelled)
9. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 8~~ claim 5 wherein the main channel of the delivery tube extends through the connector means (42).
10. (Currently amended) A giving set cap as claimed in ~~any one of the preceding claims~~ claim 1 wherein the main channel is provided with at least two inlets.
11. (Original) A giving set cap as claimed in claim 10 wherein the main channel is provided with three inlets.
12. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 11~~ claim 5 wherein at least one outlet for the delivery tube is provided in the connector means (42).
13. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 12~~ claim 5 wherein at least one inlet (45) for the subsidiary channel is provided in the connector means (42).
14. (Currently amended) A giving set cap as claimed in ~~any one of the preceding claims~~ claim 1 wherein the inlet (45) of the subsidiary channel is provided with a detachable cover.
15. (Currently amended) A giving set cap as claimed in ~~any one of claims 1 to 12~~ claim 1 wherein the inlet (45) of the subsidiary channel is provided with an adapter (60) having means (62) for its temporary attachment to the inlet, a passage (70) therethrough to act as an air vent and a detachable cap (72).

16. (Currently amended) A giving set cap as claimed in claim 13 wherein the adapter has a male or female member for mating with a ~~complimentary~~ complementary member on the inlet.
17. (Currently amended) A giving set cap as claimed in claim 14 wherein the adapter has an inner tube (64) for inserting within the inlet and a threaded region (66) for engagement with outer sides of the inlet.
18. (Currently amended) A giving set cap as claimed in claim 15, ~~16 or 17~~ wherein an air-permeable membrane is provided across the passage of the adapter.
19. (Currently amended) A giving set cap as claimed in ~~any one of claims 15 to 18~~ claim 15 wherein the cap (72) is hingedly mounted with respect to the adapter.
20. (Original) A giving set cap as claimed in claim 13 wherein a vented Luer lock cap comprises the adapter.
21. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 14~~ claim 5 wherein the inlet (45) of the subsidiary channel is provided in one side of the connector means (42).
22. (Currently amended) A giving set cap as claimed in ~~any one of the preceding claims~~ claim 1 wherein the subsidiary channel extends up one side of the delivery tube.
23. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 22~~ claim 5 wherein the connector means (42) is provided with internal threads for attachment to a drip chamber (44) of a giving set.
24. (Currently amended) A giving set cap as claimed in ~~any one of claims 5 to 23~~ claim 5 wherein the connector means (42) comprises a cylindrical member having the main channel (50) extending through the ~~centre~~ center thereof.

25. (Currently amended) A giving set comprising a drip chamber (14) attached to a line with a giving set cap (40) as claimed in claim 5 ~~any one of the preceding claims~~.

26. (Currently amended) An infusion apparatus comprising an intravenous bag or container (2), a giving set cap (40) connecting said bag/container to a drip chamber (14) having a line characterised in that the giving set cap (40) comprises a delivery tube having a main channel (50) for delivery fluid from the bag/container to the chamber and a subsidiary channel for the delivery of a different material to said bag/container, the cap having a first inlet (48) for delivery of fluid from the bag/container through the main channel to the chamber, and a second inlet (45) for the subsidiary channel, the first inlet being spaced at a sufficient distance from an outlet (46) of the subsidiary channel to allow mixing of the different material with said fluid prior to delivery to the chamber and the second inlet (45) being adapted to receive a needleless syringe.

27. (Cancelled)

28. (Cancelled)

29. (Cancelled)

30. (Cancelled)

31. (Cancelled)

32. (Cancelled)

33. (New) A giving set cap as claimed in claim 1 further comprising connector means for allowing attachment of the cap to a giving set chamber.
